

# IS THE

# PROMISE

E&I started from my interest in woodworking. At first, I made things for family members and friends. With every piece, I improved my techniques and quality. Before long, others were asking that I create furniture for them too. When time conflicts between my factory job and woodworking arose, there was no doubt about where my passion lay. From those modest beginnings, E&I has grown year by year. Why? Because our dealers and their customers expect only the highest quality furniture...and we deliver...consistently.
